Toolkit/Skills

 • Languages: React.JS/Redux, Node.JS/Express, Java, C++, Python,JavaScript XML, SQL,JSON.
 • DB: MySQL, MongoDB, Firebase.
 • Tools; MS office, Git, Packet tracer, DEV C++, Netbeans, Android Studio, Anaconda,Jupyter Notebook,Spyder,Google Colab ,VS Code.
 • Others; RESTful APIs, Linux,ML Algorithms,ETL, Deep Learning,Neural Network

Professional Summary

I am Wajeeh Ahmed, an 8th Semester student of BCS .Passionate Software Engineer for developing innovative programs that expedite the efficiency and effectiveness of organizational success. Well-versed in technology and writing code to create systems that are reliable and user-friendly. Confident communicator, strategic thinker, and innovative creator to develop software that is customized to meet a company's organizational needs, highlight their core competencies, and further their success.

Education

09/2017 - 09/2021

COMSATS University Islamabad, Wah Campus
Bachelor of Science in Computer Science. (8th Semester Ongoing)
CGPA: 3.57/4.00
Certifications:
SQL for Data Science Coursera, December 2019
Python 101 for DataScience Coursera, June 2020
Neural Networks and Deep Learning, Coursera, December 2019
Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization,Coursera,April 2020

Projects

ML PROJECTS
 • Human Activity Recognition (Yolo)
https://github.com/WajeehAhmed/Yolov4-Human-Activities-Detection
 • License Plate Recognition and Number Extraction (Yolo) https://github.com/WajeehAhmed/Lisence-Plate-Recognition-with-Custom-OCR
 • Dermatological Diseases Classification (MobileNet)
https://github.com/WajeehAhmed/Dermatological-Diseases-Classification
 • Sign Language Digit Recognition (MobileNet) https://github.com/WajeehAhmed/DeepLearning/tree/master/Mobile_net_Sign_Language_Digit
WEB Projects Hosted:
 • Ecommerce Store with Context API:
https://safeshop-41a36.web.app
This project have functionality like:
 • User login/logout   • React Routing   • Authentication (Firebase)   • Context API   • Add to basket functionality
 • Netflix Clone (Redux) (In progress) :
https://netflix-build-8f911.web.app/
This project have functionalities like:
 • RESTful api (Fetch data and population the JSX)   • Front End (Home Screen)
 • Login Screen with all authentication   • Sign up Screen and Form   • Redux for the user (login/log out) management
